Hi All,

One of our crews is going to out to the site and will make the area safe.

Thanks,  
Meghan

Hi Norma...and believe it or not, I have the old hand drawn specs for these lights. They have not worked for years...probably at least 15 years.

See if any of this helps. Even today, it would be good to have some type of barricade around this and the tree if at all possible. Thank you SO much for looking into this.

Kerry

**Subject:** Re: Pedestrian hazard -- light pole hit by car

Thank you, Norma and Megan. It's an old pole installed by the CRA which, in the past, has proven challenging from a jurisdictional perspective. However, I'm hopeful something that can be done given the accident today and the subsequent damage. Let me know if/how CD13 can assist.

Hi Kerry, Got your message and I'll see if our crews can help remove this pole. It's not our pole so I'm not sure if they can safely remove it since they don't have the circuitry info. Let me get back to you. Thanks

Norma, a food truck ran into a tree and light pole today on Hollywood Blvd. It is finally being towed, and the BID will have to clean up this mess. However, as you can see from the photos, there is a light pole that is leaning on a tree. This needs to be removed ASAP. Part of the fixture fell to the ground, and we have it in our office.

This is one of the old CRA installed poles from the 90's, but I don't know where else we would turn to have this removed ASAP.

Please advise.

Kerry
